

6. PROMASEAL® Pillows

Compressable fire-stopping pillows made from quality woven envelopes, enclosing a fire resistant granulated material. They are simple to install, re-usable and maintenance free. In the event of fire, the pillows will remain in place and form a fire barrier by charring and creating a solid mass of insulating material.

PROMASEAL® Pillows have been successfully tested and assessed by independent laboratories to meet the requirements of BS 476: Part 20: 1987 and prEN 1366: Part 3 for 180 minutes fire resistance.

Available in 3 sizes:

- Large – 330mm x 200mm x 45mm
- Small – 300mm x 200mm x 25mm
- Sausage – 330mm x 50mm x 20mm

Material safety data sheets are available upon request.

Applications

- Maintains the fire resistance of walls where openings for services are located. The pillows can provide permanent protection from the spread of fire, but they are particularly useful when only temporary protection is required.
