## DuraDuct KEX

### Zero Clearance Kitchen Exhaust Duct

DuraDuct KEX is an ETL Listed, zero clearance, double wall kitchen exhaust duct system.

DuraDuct KEX is the largest listed kitchen exhaust duct system in the industry. It is rated for 2 hours fire resistance with zero clearance to combustibles and is compliant with International Mechanical Code (IMC), National Building Code of Canada (NBCC) and National Fire Protection Association (NFPA) codes.

The DuraDuct KEX system is listed to meet the requirements of ASTM E2336 and CAN/ULC-S144 as well as being listed for compliance to the International Code Council ICC-ES AC101.2 acceptance criteria for segmented grease duct systems.

By using companion flange connections, DuraDuct KEX eliminates the field welding required for contractor fabricated grease duct systems. Utilizing a rectangular footprint, the

DuraDuct KEX system allows flexibility in the design of Type I and Type II commercial kitchen exhaust duct systems, enabling the designer to achieve the required airflows in shallower ceiling spaces.

*DuraDuct KEX listing number: ETL listing DSB FMF 120-01*

The cost effective DuraDuct KEX system has proven through extensive testing to ensure a safe solution for new restaurant exhaust systems, commercial kitchens and retrofitting kitchen exhaust duct systems.
